News

Version 0.2:

- Library updated to 2.11.0 version of pivottable
- Major clean-up and new features added by Nicolas in the pivottable library (e.g. the ability to order items directly in the UI: fantastic!)
- Localization in German, Russian etc. added (but not tested)
- Updated versions of jquery and jquery-ui
- Minor changes / corrections to README and other docs
- Simplifications in some of the folder structure

Version 0.1.5.9:

- Document **inclusions** and **exclusions** explicitly
- Amend the case when a single **inclusions** or **exclusions** was specified (wrongly `auto_boxed`)
- css of filtered dimension now in bold (to help in case of many dimensions)

Version 0.1.5.8:

- Amended a regression crept in during CRAN submissions (**`rendererName`** stopped being “programmable”)

Version 0.1.5.7:

- **`onRefresh`** Added ability to get back into shiny parameters choosen by the user
- Added shiny example of **`onRefresh`** and of dynamically change parameters
- More clean up for CRAN submission

Version 0.1.5.6:

- General clean up for CRAN submission

Version 0.1.5.5:

- new css (blue) for parts of the table
- general clean up in preparation to cran submission
- added tables as allowed data items for th epivot table (with forced conversion to `data.frame`)

Version 0.1.5.4:

- Introduced sorters (thanks to palatinuse for this implementation).
- Fixed a bug preventing to update at run time parameters of the pivot table within the same data item

Versions 0.1.5.x are based on (the minimised version of):

- pivottable 1.6.3
- jquery 1.11.0 (compatibility with shiny 1.12.1)
- jquery.ui 1.10.4 (compatibility with shiny 1.12.1)
- jquery.ui.touch-punch 0.2.3
- d3 3.5.5
- c3 0.4.10
